Work Experience

June 2021 to July 2026

- **Title:** Senior Android Developer
- **Company name:** Zendesk (https://www.zendesk.com/)
- **Company Description:** Zendesk is a service-first CRM company that builds software designed to improve customer relationships.
- **Duties and responsibilities:**
  - Actively participate in code reviews, sprint planning, and technical discussions to maintain high quality standards and align with project goals.
  - Design, implement, test, release, and continuous iteration of Zendesk SDKs to deliver seamless customer experiences for integrators.
  - Improving existing SDK functionalities and resolving bugs to ensure stability and performance across multiple SDKs.
- **Summary:** I was responsible for designing developer friendly APIs for developers integrating it into their apps, providing a concise, efficient, and reliable way to solve problems and deliver seamless messaging experiences.

April 2020 to February 2021

- **Title:** Android Software Developer
- **Company name:** Flipdish (https://www.flipdish.com/)
- **Company Description:** Flipdish helps any restaurant or takeaway anywhere build their brand and their business with an online ordering system.
- **Duties and responsibilities:**
  - Maintained and enhanced Flipdish's white-label Android ordering app used by restaurants and takeaways across Ireland and the UK.
  - Implemented new UI features and screens aligned with brand guidelines, working closely with designers.
- **Summary:** I was responsible for maintaining Flipdish's native Android white-label app.

January 2018 to April 2020

- **Title:** Android Developer
- **Company name:** Bamboo (https://www.bamboo.app/)
- **Company Description:** Bamboo is a mobile app that allows you to order and pay in advance in cafes and restaurants relieving the need to wait.
- **Duties and responsibilities:**
    - Owned the full development lifecycle of the Bamboo consumer app (café/restaurant pre-ordering)
    - Architected and shipped a major app rebranding and key feature refactoring using MVVM, significantly improving code structure and scalability.
    - Built and maintained Firebase Firestore and Cloud Functions back-end (TypeScript) to support real time ordering and payment flows.
    - Design, ship new features using MVVM architecture and publish on Google Play
    - Work within an Agile team environment .

- **Summary:** I was responsible for maintaining, improving and implementing features for the native Android app (https://play.google.com/store/apps/details?id=ie.bambooapp.customer&hl=en)

July 2015 to March 2016

- **Title:** Android Developer
- **Company name:** Trust5 (https://www.trust5.com)
- **Company Description:** It is a company that designs and develops applications for Enterprise Customers.
- **Duties and responsibilities:**
    - Shipped new features and performance improvements for an enterprise grade health & wellness Android app (Bupa Boost)..
    - Worked closely with graphic designers to deliver optimised, adaptive UI including custom animations, achieving a polished, brand-consistent user experience.
- **Summary:** I was working on an existing native Android app, shipping new features and improving app performance.(https://play.google.com/store/apps/details?id=com.bupa.boost)
